DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 28-33, drawn to a method of determining a value of a resistance, classified in class 365, subclass 158.
- II. Claims 34-37, drawn to a method of measuring the value of a resistance, classified in class 324, subclass 713.
- III. Claims 38-39, drawn to a method for sensing a value of a resistance, classified in class 365, subclass 148.
- IV. Claims 40-42, drawn to a method of measuring a resistance of a resistor, classified in class 324, subclass 691.
- V. Claims 43-46, drawn to a method of measuring an impedance, classified in class 324, subclass 600.
- VI. Claims 47-51, drawn to a method of making a memory integrated circuit, classified in class 365, subclass 189.07.
- VII. Claim 52, drawn to a device state sensing circuit, classified in class 365, subclass 236.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I, II, III, IV, V, VI and VII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions in said Groups I to V above recite distinct methods of using a product encompassing mutually exclusive elements or features; while on the other

Application/Control Number: 10/674,550

Art Unit: 2824

hand, the inventions of Group VI and Group VII respectively claim a method for making a memory integrated circuit and a device state sensing circuit.

Because these inventions are distinct for the reasons given above, and have acquired a separate status in the art as shown by their different classification, and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Q. Tran whose telephone number is (571) 272-1885. The examiner can normally be reached on Mon - Fri 8:30 AM - 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard T. Elms can be reached on (571) 272-1869. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
